

01. (a) $\int -2\sin x dx = \dots$ (b) $\int \frac{\sec^2 x}{\sqrt{x}} dx = \dots$ (c) $\int 2\theta + \cos\theta d\theta = \dots$	
02. (a) $\int \sqrt{x} + 3\cos x dx = \dots$ (b) $\int \sin x^2 dx^2 = \dots$ (c) $\int (\sin x)^2 d\sin x = \dots$	
03. Jika $\theta$ adalah konstanta, maka: (a) $\int (\theta + \sin x) dx = \dots$ (b) $\int \cos x d\theta = \dots$	
04. (a) $\int \frac{1}{\cos x} d\sin x = \dots$ (b) $\int 2\sin^2 \theta d2\theta = \dots$	
05. (a) $\int 2\sin x \cos x d(2x) = \dots$ (b) $\int 4x^2 - \cos 2x d(2x) = \dots$
